Product	Schlage Utility Software (SUS)
Version Number	Version: 6.7.0
Engineering Release Date	December 21, 2018
Production Release Date	January 2019
Customer Support	For more information or support, visit our website .

Attention:

This document contains the release notes for Schlage Utility Software (SUS) version 6.7.0 which includes updates from the previous release 6.6.3 in July 2018.

The following sections describe this release in detail and will provide important information that supplements the SUS User Guide.

Installation and Upgrade Notes:

Installation

Follow the “SUS Update Guide – Appendix A” section of the Schlage Utility Software, user guide for installation and upgrade details.

You will find the latest User Guide [here](#) and at the Allegion Library [here](#) by searching for “Schlage Utility Software User Guide”.

Who should upgrade?

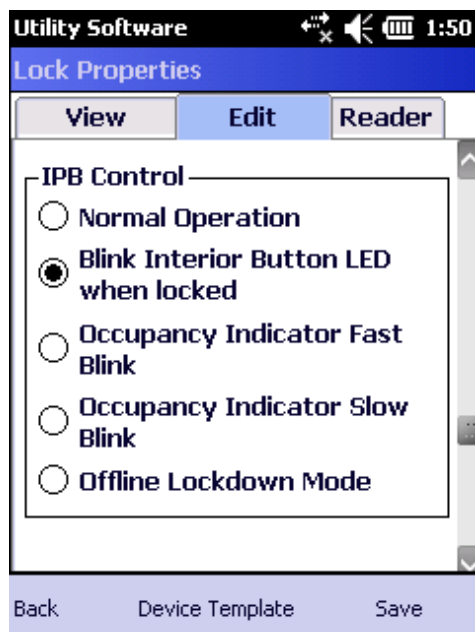

Allegion recommends keeping all devices up to date with the latest firmware and software. We strive to provide the best products and service for our customers.

Installing the latest firmware and software releases will allow customer(s) to get the most from their devices and allow for better overall functionality and product support.

Specifically, all customers interested in the following *Feature Updates* and *Recent Changes* should update their devices:

Feature Updates:

- **CO-200-40 (Privacy Function):** New Occupancy Indicator and Offline Lockdown feature
 - New options have been added to the IPB Control box to enable/disable the new “Occupancy Indicator” and “Offline Lockdown Mode”

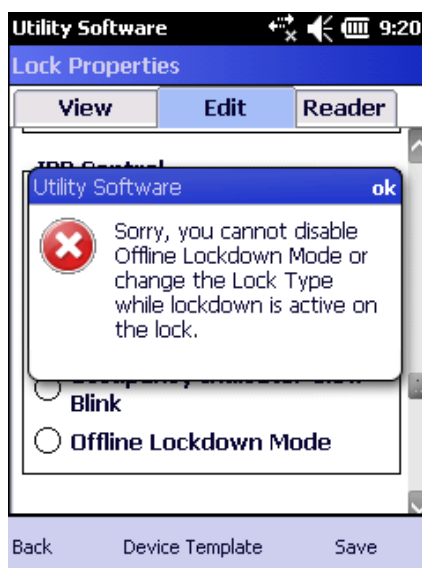

NOTES:

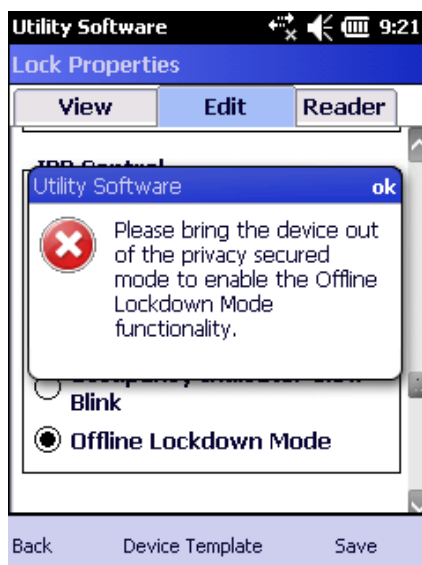

- New features require CO200/220 Firmware 2.14.1 (CO.A.30) or later
- New features are only available on CO200/220 locksets with an Inside Push Button (40 - Privacy Function)
- Only one IPB Control setting may be select at a time
- Normal Operation is the Default IPB Control setting

Recent Changes:

- A new SUS error message has been added for attempting to disable the Offline Lockdown Mode while the lock is currently in Offline Lockdown
 - First Deactivate Offline Lockdown before changing the IPB Control setting

- A new SUS error message has been added for attempting to enable Offline Lockdown Mode while the lock is currently in Privacy Mode
 - First deactivate Privacy Mode before changing the IPB Control setting

- **All AD devices:** With AD.A.123 Firmware (or earlier) – released in Dec 2018.

Devices	Firmware Version
AD-200	2.49.0
AD-250	2.48.2
AD-300	2.49.1
AD-302	2.1.1
AD-400	2.49.2
AD-402	2.1.3
KP-PR-SM-MT	2.47.4
KP-PR-SM-MT2	2.3.5
MG	2.44.0
PIB300-2D	2.19.1
PIM400-485-RSI	2.29.2
PIM400-485-VBB	2.29.2
PIM400-TD2	2.25.1
WPR400	2.29.2
WRI400	2.9.2
CT5000	2.7.0

- **All CO devices:** With CO.A.30 firmware (or earlier) – released in Dec. 2018.

DEVICE	Firmware Revision
CO-200 KP	2.14.2
CO-200 PR	2.14.1
CO-200 MAG	2.11.2
CO-220 KP	2.14.2
CO-220 PR	2.14.1
CO-220 MAG	2.11.2
CO-250	2.13.1

- **All serial communication legacy products** (CM, CL, CT1000, etc.)
